

Noa Ravenel

Automation engineer. I build tools that check their own work.

Four projects from the last three years. Each one ships with tests and one number you can verify.

SELECTED WORK

2023 TO 2026

01

COMMAND-LINE TOOL

Ledger Lint

Finds mismatched totals in exported invoices before they reach the accountant. Runs on a folder and prints the rows that do not add up.

412 tests, all passing on every commit

TypeScriptNode.jsSQLite

02

WEB APP

Shift Board

A scheduling page for a 30-person clinic. Swaps are approved in one tap and written to the shared calendar.

1.8 s to a usable screen on a mid-range phone

ReactPWAPostgres

03

DATA PIPELINE

Quiet Alerts

Turns a day of noisy server logs into one summary with the three lines that matter, sent every morning.

96% fewer alerts in a 30-day side-by-side test

PythonRegexCron

04

TEMPLATE KIT

Right-to-Left PDF Kit

Invoices and letters in Hebrew from plain HTML, with real selectable text and page breaks that hold.

14 templates, each with its own print test

HTMLPrint CSSHebrew
